

DeVry Grads are in demand

Since 1931, nearly 250,000 students — more than 49,000 in the last decade alone — have graduated from DeVry and become productive members of the work force. For the 10-year period ending June 2005, 90 percent of DeVry graduates who actively pursued employment or who were already employed when they graduated, held positions in their chosen fields within six months of graduation.¹

DeVry University is located in major metropolitan areas across North America and online.
